## PROFILE

---

Fresher Full-Stack Developer with hands-on internship experience and self-driven projects spanning both frontend and backend development. Skilled in building REST APIs with Spring Boot and Java, crafting responsive interfaces with React and Next.js, and managing relational databases with MySQL. Comfortable working across the full stack from designing authentication workflows and clean architectural patterns to deploying production-ready applications on cloud platforms. Driven by a genuine interest in building reliable, scalable, and user-focused web solutions.

## TECHNICAL SKILLS

---

**Languages:** Java, JavaScript, SQL  
**Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS  
**Backend:** Spring Boot, REST APIs  
**Databases:** MySQL, MongoDB, Firebase  
**Tools:** Git, Docker, Postman

## EDUCATION

---

**MET Institute of Information Technology** Aug 2025 - Feb 2026 | Nashik, Maharashtra  
*PG-DAC (Advanced Computing)*  
*Relevant Coursework: Data Structures, Web Technologies, Software Engineering*

**Laxmi Institute of Technology** Sep 2021 - May 2025 | Bhilad, Gujarat  
*Bachelor of Engineering in Information Technology*

## INTERNSHIPS

---

**Full Stack Developer Intern, at Softweb IT Services & Consulting** Jan 2025 - May 2025 | Vapi, Gujarat

- Built and maintained client-facing web pages using **HTML, CSS, JavaScript, PHP, and MySQL**
- Implemented secure authentication and responsive UI layouts across multiple client projects
- Participated in Agile workflows including sprint planning, bug fixing, and deployment

**React Developer Intern, at InfoLabz IT Services** Jun 2024 - Jul 2024 | Remote

- Learned React fundamentals including Hooks, component architecture, and integration in a professional setting
- Built small UI components and explored SPA routing and responsive design patterns

## PROJECTS

---

**StreetBite | Spring Boot, Next.js, MySQL, Firebase** [Live](#) | [GitHub](#)

- Built and deployed a full-stack street food discovery platform with **Next.js 16 + TypeScript** frontend and **Spring Boot 3/ Java 21** REST API with Swagger-documented endpoints
- Implemented **multi-role JWT authentication** (customer/ vendor/ admin) using Spring Security with cookie-based sessions and cross-origin deployment config
- Integrated dual-database architecture **MySQL** for persistent data and **Firebase** for real-time features alongside geocoding, vendor analytics, and a community forum

**Focus Arena | ASP.NET Core 8, React, MySQL, SignalR** [Live](#) | [GitHub](#)

- Engineered a gamified productivity platform using **ASP.NET Core 8** backend following **Clean Architecture** (Domain/ Application/ Infrastructure/ API layers) with Entity Framework Core and MySQL
- Built **real-time features** guild chat, global chat, friend system, notifications, and live leaderboards — using **SignalR** hubs with JWT Bearer authentication (access + refresh tokens)
- Developed a **React 18 + TypeScript** frontend with Zustand state management, Framer Motion animations, and deployed via **Docker** on Render + Vercel

## ADDITIONAL KNOWLEDGE

---

Understanding of **C#** and backend development using **ASP.NET Core**. Familiar with system-level fundamentals such as **Operating Systems** and **Computer Networks**, along with development practices like **SDLC** and **Agile**. Working knowledge of **system design** concepts including distributed systems, caching strategies, and API rate limiting.
